ENGLISH COMPREHENSION

Passage - 1 :

The Conservative is not an extreme individualist. He may be willing to concede numerous arguments of the unqualified individualists, for his own respect, because the dignity of the individual is not surpassed by that of any other man. Yet, he cannot agree to the full implications of individualism, which is based, so he think, on an incorrect appraisal of man, society, history and government. In his own way, the individualist is as much a perfectionist as the Socialist, and with perfectionism the Conservative can have no **truck**.

In particular, the Conservative refuses to go all the way with economic individualism. His distrust of the unfettered man, his recognition of groups, his sense of the complexity of the social process, his recognition of the real services that the government can perform – all these sentiments make it impossible for him to subscribe to the dogmas and shibboleths of economic individualism – *laissez faire*, the negative state, enlightened self-interest, the law of supply and demand, the profit motive – The Conservative may occasionally have kind words for each of these notions, but he is careful to qualify his support by stating other, more important social truths. For example, he does not for a moment deny the prominence of the profit motive, but he insists that it be recognised for the selfish thing it is and be kept within reasonable socially imposed limits.

Passage - 2 :

I was lying on a ridge scanning, with field glasses, a rock cliff opposite me for that, the most sure-footed of all Himalayan goats. On a ledge halfway up the cliff, a thar and her kid were lying asleep. Then, the thar got to her feet, stretched herself, and the kid immediately began to feed. After a minute the mother freed herself, took a few steps along the ledge, poised for a moment, then jumped down on to another but a narrower ledge some twelve to fifteen feet below her. As soon as it was left alone the kid started running backwards and forwards, stopping every now and then to peer down at its mother, but unable to summon the courage to jump down to her, for below the narrow ledge was a sheer drop of a thousand feet. I was too far away to hear whether the mother was encouraging her young, but from the way her head was turned I believe she was doing so. The kid was getting more and more agitated and, possibly fearing that it would do something foolish, the mother went to what looked like a mere crack in the vertical rock face and, climbing it, rejoined her young. Immediately on doing so she lay down, presumably to presumably to prevent the kid from feeding.

After a while she got to her feet again, allowed the kid to drink for a minute, poised carefully on the brink, and jumped down while the kid again ran backwards and forwards above her. Seven times in the course of the next half-hour this procedure was repeated until finally the kid, abandoning itself to its fate, jumped, and landing safely beside its mother was rewarded by being allowed to drink its fill.
